

# Submersible Pump

## L Series

Suitable for pumping clean water from wells, ponds, reservoirs, and other water sources.

- Suitable for fountains, waterfalls, garden watering, and landscaping applications.
- Suitable for agricultural applications and sprinkler systems.
- Suitable for aquaculture farms.
- Suitable for draining flooded or waterlogged areas.

### Pump Features

The pump casing and base are made of high-quality polymer plastic, providing excellent strength and durability. The compact and lightweight design helps save installation space, while the built-in handle allows for easy transportation.

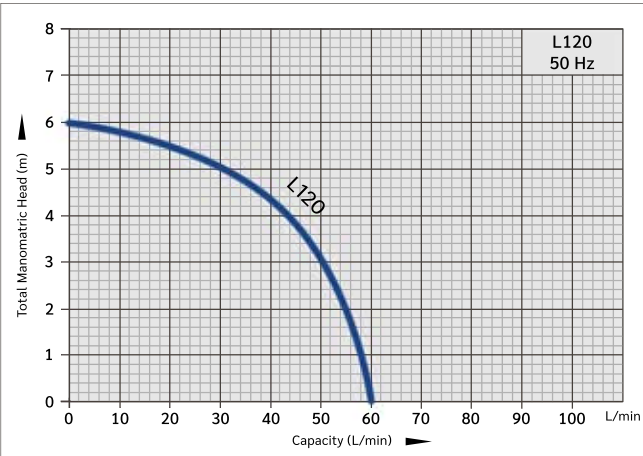

The bearings are fitted with rubber seals, providing good resistance to moisture.

Double Safety Protection helps prevent water from entering the motor through a combination of a Mechanical Seal and Oil Seal.

The semi-open impeller is made of high-quality ABS plastic for excellent strength and durability.

The power cable is supplied with a plug and has a length of 5 meters.

### Specifications

| Model                 | L120        |
|-----------------------|-------------|
| Power (W)             | 120         |
| Cycle (Hz)            | 50          |
| Voltage (V)           | 220-230     |
| Current (A)           | 1           |
| Max Head (m)          | 6           |
| Max Flow Rate (L/min) | 60          |
| Outlet (inch)         | 1           |
| Net Weight (kg)       | 2.45        |
| Gross Weight (kg)     | 2.7         |
| Packaging Size (mm)   | 160x160x264 |
